- B. The DHCP server has a new AirPort card installed.
- C. An AirPort Base Station has been moved closer to the computer.
- D. The DHCP server on the Built-in Ethernet network is no longer available.

Correct:D

21. The default network protocol in Mac OS X 10.4 is ____.

- A. IPX
- B. SMB
- C. TCP/IP
- D. Netbios
- E. AppleTalk

Correct:C

22. The Lookup tool in Network Utility _____.

- A. finds the complete route between your computer and another computer on an IP network
- B. determines which ports are open on a remote computer
- C. resolves host names to IP addresses
- D. resolves IP addresses to host names
- E. looks up routing table information

Correct:C D

23.You are troubleshooting a volume connected via target disk mode. What could present a problem?

- A.Target disk mode volumes are locked by default.
- B.Target disk mode volumes have no file system journal.
- C.Keychains and preferences must be unencrypted before they can be viewed.
- D.Standard Mac OS X file ownership can be ignored, so files can be deleted accidentally.

Correct:D

24.In Mac OS X v10.4, a non-administrator user, Linda, can store her files in _____.

- A./System
- B./Users/linda
- C./Home/linda
- D./Applications

Correct:B

25.Disk Utility can display _____.

- A.a disk drive's capacity
- B.a list of partitions on a disk drive
- C.the number of files in the system folder
- D.the volume format of a mounted partition
- E.the number of files on an unmounted partition
- F.a graphic with the locations of file fragments on a RAID volume

Correct:A B D

26.How do you force a Macintosh computer to start up from a disc in the optical drive?

- A.Press and hold the V key while the computer starts up, and enter boot cd at the prompt.
- B.Press and hold the C key while the computer starts up.
- C.Choose "Restart from Disc" from the Apple menu.
- D.Press and hold the power button for 5 seconds.

Correct:B

27.While a Mac OS X computer on your network is starting up, its screen displays a gray, spinning globe, similar to the one shown in the exhibit. What does the spinning globe indicate?

- A.The computer is unable to locate a valid system folder.
- B.The computer is starting up from a network system image.
- C.The computer is starting up from a system folder on the local startup disk.
- D.The computer is downloading a system update before continuing the start up process.

Correct:B

28.You press the power button on a Mac OS X computer, but instead of starting up, its screen

displays a folder with a flashing question mark, like the one shown in the exhibit. What does this indicate?

- A. Open Firmware did not find a startup disk.
- B. The computer is starting up into Mac OS 9.
- C. There are multiple system folders on the startup disk.
- D. The computer is starting up from a network system folder.

Correct:A

29. When Maria logs in on her Mac OS X v10.4 computer, a utility she recently installed launches and disables the mouse and keyboard. How can Maria prevent the utility from automatically launching when she logs in?

- A. Hold down the V key while the computer starts up.
- B. Hold down the Shift key immediately after logging in.
- C. Hold down the Option key while the computer starts up.
- D. Log in as another user, and use Disk Utility to fix permissions on the boot volume.

Correct:B

30. How do you start up a Mac OS X computer in single-user mode?

- A. Restart while holding down Command-S.
- B. Restart while holding down Command-Option-S.
- C. Choose "Restart in single-user mode" from the Apple menu.
- D. Select Single-User Mode in the Startup Disk preferences, and restart.

Correct:A

Pass4Easy.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on.
